ABOUT US

We manufacture precision mechanical components and deliver superior CNC machining services for industries that require strict reliability, accuracy, and regulatory compliance.

Our approach combines innovation, operational excellence, and technical commitment, backed by qualified personnel, advanced machinery, and a culture of continuous improvement.

At **VICOM MAQUINADOS**, we serve sectors such as energy, automotive, and industrial, delivering products manufactured from drawings or physical samples, with finishes and tolerances that meet the highest market standards.

MISSION

Guarantee the reliability and durability of our clients' operations through machining and manufacturing solutions for mechanical components with precision, efficiency, and compliance, adapting to their requirements and exceeding their expectations.

VISION

Become the benchmark company in precision CNC machining, recognized for our operational excellence and our ability to boost our clients' productivity in strategic sectors.

VALUES

Quality
Precision
Safety
Continuous Improvement
Teamwork

**CNC Machining with commitment,
quality, and measurable results**

OUR SERVICES

SPECIALIZED CNC MACHINING

Threading of drilling pipes in compliance with oil industry standards.

General turning of precision parts in a wide range of materials, from mild steels to tool-grade steels, stainless steels, aluminum, bronze, and brass, as well as nylamid and various plastics used in industrial and oil applications.

CUSTOM PRODUCTION

Manufacturing of parts from drawings or physical samples, focused on applications for various industrial sectors (energy, automotive, general industry, etc.).

High and medium-volume series production, ideal for customized or replacement batches.

OUR SERVICES

QUALITY CONTROL

Dimensional inspection and tolerance verification.

Quality control at every stage of the process.

Thread inspection and measurement validation using precision instruments.

ENGINEERING

Reverse engineering and development of parts from physical samples.

SURFACE TREATMENTS AND FINISHES

Coatings: phosphating.

INDUSTRIES SERVED

Energy, automotive, and general manufacturing.

ROTARY SHOULDERED CONNECTIONS

Drill Pipe

Heavy Weight Drill Pipe
(HWDP)

Drill Collars

Crossovers

Stabilizers

Drilling JARS

Mud Motors

Float Subs

Mills

Reamers

CAPABILITIES

Our machines have a turning capacity of 800 mm and a machinable length of up to 1.5 m, as well as a bar feed of 11 inches.

GENERAL TURNING IN VARIOUS MATERIALS

Ring

Flanges (Except for Drill
Holes)

Plugs

Threaded Plugs

Hydraulic / Pneumatic
Connectors

Threaded Joints

Spacers

Pulleys

Bolts

Threaded Bolts

Shafts

Spindles

Nuts

Bushings

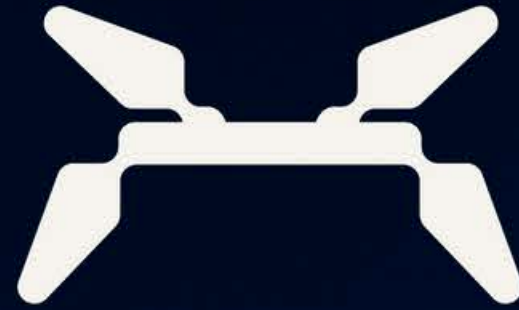

Sleeves

Linings

CAPABILITIES

From mild steels to tool-grade steels, stainless steels, aluminum, bronze, and brass, nylamid, and various industrial-use plastics
